SUMMARY

.NET Developer with 2.5 years of IT infrastructure experience, now focused on software development. Skilled in ASP.NET Core, API design, and SQL. Strong problem-solving background and passionate about building scalable, efficient applications.

EDUCATION

Erciyes University, Kayseri, Turkey

Graduation year: 2022

- Bachelor of Science in Computer Engineering, GPA: 2.94/4.0.

PROFESSIONAL EXPERIENCE

YDA Dalaman Airport , Mugla, Turkey

October 2022 - January 2025

IT Specialist

- Developed internal tools using ASP.NET Core to streamline IT operations (e.g., ticket tracking, safety management system)
- Performed database checks on servers.

PROJECTS

Airport Pax Tracker System

March 2024 - June 2024

- Developed a Windows Forms application in C# with MSSQL integration to manage and track passenger data.
- Designed relational database structure and implemented CRUD operations, ensuring reliable and efficient data handling.

Airport Safety Management System

January 2024 – March 2024

- Built a web-based safety management system using .NET 8 and MSSQL, deployed on IIS for production use.
- Implemented role-based access control, automated incident workflows, and reporting features to enhance operational safety.

•

Job Entry

March 2025 – April 2025

- Developed a .NET application for job and task management, implementing efficient CRUD operations and user-friendly interfaces.
- Designed the database schema and integrated backend logic to ensure reliable data processing.

CarBook – Car Rental System

April 2025 – June 2025

- Built a car rental management system using .NET, enabling reservation tracking, fleet management, and user management.
- Integrated PostgreSQL database for secure and scalable data storage.

Fault Tracking System**June 2025 – July 2025**

- Developed a web-based fault tracking system using .NET 9 with AI-assisted features to predict and categorize incidents.
- Created RESTful Web API endpoints and implemented secure database operations for seamless workflow management.

IT Inventory Tracking System**July 2025 – August 2025**

- Built an inventory management Web API using .NET 9 and MSSQL to track IT assets and assignments.
- Implemented advanced filtering, reporting, and role-based access control for efficient IT operations.

English Vocabulary Learning Mobile App (Flutter)**August 2025 –...**

- Developed a Flutter-based mobile app with subscription system, published on Google Play Store and Apple App Store.
- Implemented interactive English vocabulary learning features with real-time progress tracking and user personalization.

SKILLS

Programming languages: C#**Computer software/frameworks:** Microsoft Office, Git, React, Docker, .Net, RESTful API, .Net MVC**Languages:** Turkish (Native), English (Upper-Intermediate - Technical Documentation, Communication)
